EDUCATION

FAST - National University of Computer and Emerging Sciences
Computer Science Bachelors

Islamabad, PAK
2018 - 2022

EXPERIENCE

Idanimo LLC | Senior Software Engineer

Islamabad, PAK | August 2024 - Present

- Lead development of video CV platform (Cvvid), enabling users to record/edit videos and generate QR codes for sharing.
- Developed a flexible, dynamic Online Visa Application System using Next.js, React Flow, and PDF integration for document handling.
- Built DDID App (React Native wallet) for secure storage of digitally signed documents and improved performance by upgrading React from 16 to 18.
- Revamped Idnmo official website with Next.js, Tailwind CSS, Server Actions, and SEO optimizations.
- Integrated modern tooling (Docker, NextAuth, Redux Toolkit) and adhered to best practices (GitFlow, secure storage) to deliver high-performance, scalable solutions.

Aurora Solutions | Full Stack Developer

Islamabad, PAK | August 2022 - July 2024

- Built a Coursera-like educational platform (AWS EC2, S3, NestJs) for scalable video hosting and course content.
- Created pixel-perfect web (Next.js, Server Actions, TypeScript) and mobile apps (React Native, Redux Toolkit) for efficient store and inventory management.
- Integrated blockchain functionality (React Web3, React Native, Ethers, Web3Modal, Viem, Metamask) for both Fitcoins front-end web application and React Native mobile app.
- Employed best practices (GitFlow, Docker, secure storage) to ensure performance, security, and maintainability.

SKILLS

Programming Languages:	C++, Python, Javascript, TypeScript
Libraries/Frameworks:	ReactJS, NextJs, React Native, Tailwind CSS, Material UI, React Flow, NestJs, ExpressJs, React Query, RTK, GraphQL, Bootstrap, S3, Ec2, Lamda, ECS
Tools / Platforms:	GitFlow, Jira, Android Studio, AWS
Databases:	SQL, Mongo Db

PROJECTS / OPEN-SOURCE

Think Study And Learn | [Link](#) *NextJs, RTK, Open AI, NestJs, EC2, ECR, IAM, S3 Bucket, Cloudfront,*

- Contributed as a full-stack developer to build an educational platform similar to Coursera, where students can register, watch video content, and access course materials.
- Leveraged AWS services for scalability, reliability, and efficient data management.
- Built a multimodal AI assistant supporting real-time voice-to-voice conversations, text chat, and image understanding, powered by streaming ASR/TTS and vision models, with safety, analytics, and on-device/offline fallbacks.

Cell Operative | [Link](#)

NextJs, ServerActions, ServerSideRendering, Typescript, TailwindCss

- In my current role, I created the pixel-perfect designs and integration using server actions. It is a store management system where you can manage your inventory
Also add the multilanguage support

Cvvid (CV Video Editor) | [Link](#)

NextJs, NextAuth, Social Logins, Tailwind CSS, FFMPEG, Docker, Server Actions, Google Analytics, SEO

Developed a platform to create and edit video CVs by uploading or recording live, then generating a QR code for easy sharing.

Online Visa Application System | [Link](#) *NextJs, Server Actions, Server-Side Rendering, TypeScript, Tailwind CSS, React Flow*

- Developed a dynamic online visa application system to allow users to apply for visas without visiting embassies.
- Built a flexible structure to adapt to varying visa requirements across different countries.
- Integrated a PDF reader for seamless document uploads and reviews.

DDID App (React Native Wallet) *React Native, Hooks, Redux Toolkit, Ethers, Secure Storage*

- Built a wallet app for storing digitally signed documents.
- Migrated the project from React 16 to 18, updated dependencies, and improved overall performance.

Cell Operative (React Native) *React Native, Redux Toolkit, TypeScript, Secure Storage, REST APIs*

- Created a React Native mobile app (Cell Operative) with modern practices

Fitcoin *ReactJs, Reacttoolkit, Ethers, Web3Modal, Viem,BlockchainIntegration, Metamask*

- As a key member of the Fitcoin team, I have been instrumental in integrating blockchain technologies into the Fitcoin web application's front end, built using React. In this role, I've leveraged my expertise in React development to connect the user interface with the blockchain backend seamlessly.

Fitcoin Mobile App *ReactNative,ReactToolkit, Ethers, Web3Modal, Viem ,Metamask, ,Blockchain Integration,*

- In this role at Fitcoin, I'm extending the Fitcoin ecosystem by developing a mobile app using React Native. This mobile app offers the same robust functionality and seamless blockchain integration as the web

CERTIFICATIONS

- Frontend Developer (React) - **HackerRank**
- React (Basic) - **HackerRank**
- CSS - **HackerRank**

HONORS & AWARDS

- Employee of the Month at Aurora Solutions, September 2023
